***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the structure for the telescopic forks must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. As it stands it is impossible to determine how the forks extend and retract without a depiction of the now positively recited forks.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims and 8-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Regarding claim 1 the fixed connection (10) does not act to rotate the guide part when the forks are retracted in the embodiment as shown in figures 5-8. In this embodiment the spring is what operates the guide part to push the load away from the magnets. Further the amendments to claim 1 to include the fork structure are not supported by the specification. There is no structure disclosed for causing the forks to extend and retract. Nor is any shown in the drawings. This structure was not previously recited in a positive manner before, doing so in the current amendments lead to this new rejection. Any claim not specifically rejected is rejected based upon it dependency.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The disclosed invention is inoperative and therefore lacks utility. The device cannot work as claimed. Claims 1 and 8-11 are rejected under 35 U.S.C. 101 because:

If the fixed connection forces the load away from the magnet when extended or retracted then it will always keep the magnet from contacting the load to be picked up

no matter the relative position of the forks. As the device is inoperable as claimed it can not be examined on the merits at this time.

***Response to Amendment***

The amendments to the claims filed on June 24, 2010 have been entered into the record.

***Response to Arguments***

Applicant's arguments with respect to claims 1 and 8-11 have been considered but are moot in view of the new ground(s) of rejection. The arguments against the claim number objection are persuasive and the objection is withdrawn.
